Experience

PPG Industries **Programmer Analyst II** 06/2015 - Present

- Worked both in teams and individually to complete .NET/SQL projects to improve and fix business processes. Developed both new software and maintained/fixed older applications
- Lead support of CRM tool (Microsoft Dynamics CRM) working closely with users in different parts of the business and customized solutions to their needs to make the tool as useful as possible

Technologies: VB, ASP.NET, SQL, Javascript, HTML, CSS

PPG Industries **IT Intern** 05/2014 - 08/2014

- Added competitor product matching feature to an existing customer facing web application, and then made the app responsive to tablet and phone screen sizes
- Transformed the now mobile capable web app into a native mobile app using Cordova Phonegap

Technologies: C#, ASP.NET, MVC, Cordova Phonegap, HTML, CSS

Penn State THON **Tech Captain/THINK Developer** 04/2014 - 04/2015

- Worked in a small team to complete a wide array of web development projects needed by the various organizations supporting the largest student run philanthropy in the world. Projects included an inventory management and supply request system, as well as a participant medication entry system

Technologies: PHP, SQL, Javascript, Git, HTML, CSS

Penn State University **Web Developer** 06/2013 - 04/2015

- Created and maintained several websites for various organizations within Penn State

Technologies: HTML, CSS, FTP
